Prior Notice:

Subject: Kemmerer Notice of Recall and OFO

Notice Text:

Effective Gas Day Saturday, January 13, 2024 and until further notice, Northwest is issuing an OFO Recall Advisory and Operational Flow Order (OFO) through the Kemmerer compressor pursuant to Section 14.15(d) of its Tariff.

Under the OFO Recall Advisory, Shippers are required to: (1) recall capacity that is subject to an OFO recall provision; or (2) take other action that is acceptable to Northwest, to satisfy its OFO obligation.

If the northbound scheduled quantities exceed the greater of Northwest's design capacity of 655,000 Dth/d at Kemmerer or the operationally available capacity at that location on that day, Northwest will provide Shippers with their specific OFO obligations by 4:00 p.m. MST. Shippers must comply with their OFO obligations no later than the Evening nomination deadline (5:00 p.m. MST).

Shippers can monitor throughput quantities and obtain a copy of Northwest's OFO procedures on Northwest's website at www.northwest.williams.com.

If you have any questions, please contact your Commercial Services Representative or the hotline at 713-215-6301.
