<b>Line Pack Condition:</b>	High Line Pack
<b>Extent of the Notice:</b>	Arizona T-1 Customers
<b>Reason for the Notice:</b>	El Paso SOC
<b>Requested Action:</b>	No Banking- Match or nominate less gas than projected usage

### **Notice Text:**

El Paso Natural Gas LLC (EPNG) Pipeline has declared a system-wide Strained Operating Condition (SOC) due to a high line pack condition.

EPNG has reduced the daily positive imbalance tolerance to be less than or equal to 5% of scheduled quantities. Southwest Gas requires that transportation customers in Arizona closely monitor their nominations and scheduled quantities versus usage and Match or nominate less gas than projected usage.

Be aware that if pipeline conditions change, the tolerance stated above may be adjusted. Customers whose imbalance is outside of the tolerance as set forth by EPNG will be subject to a pro rata share of any upstream pipeline charges and/or penalties that were incurred for such excess quantities.

If you have any questions concerning this information, please contact your gas scheduling representative or your Industrial Gas Engineer.
