Subject: SPIRE MISSOURI EAST WEATHER REPORT

Weather Alert

Due to predicted colder weather and critical notices issued on several pipelines upstream of the Spire Missouri city gate, effective December 13th, 2025, and continuing until further notice, Spire Missouri would like to make sure that marketers are making a concerted effort to avoid any under-deliveries to their customers. Marketers are encouraged to make sure that deliveries are consistent with customers' anticipated usage during this time period. If supplies are underdelivered, we reserve the right to issue a system-wide or marketer specific operational flow order in order to maintain and protect the integrity of our distribution system.

If you have any questions, please contact us.

Thank you,

Peter Burke
