<b>Duration of Notice:</b>	Until Further Notice
<b>Line Pack Condition:</b>	Low Line Pack
<b>Extent of the Notice:</b>	Arizona T-1 Customers
<b>Reason for the Notice:</b>	El Paso SOC
<b>Requested Action:</b>	No Drafting- Match or nominate more gas than projected usage

### **Notice Text:**

El Paso Natural Gas (EPNG) has declared a **Strained Operating Condition (SOC)** due to low line pack conditions on El Paso.

EPNG has reduced the daily negative imbalance tolerance to 5% of scheduled quantities. Southwest Gas Corporation requires that transportation customers in Arizona closely monitor their nominations and scheduled quantities and match or nominate more gas than projected usage.

The tolerance stated above may be adjusted by EPNG if pipeline conditions change. Customers who create an imbalance in excess of the specified imbalance tolerance stated above may be subject to a pro rata share of any upstream pipeline charges and/or other charges that were incurred for such excess quantities.

If you have any questions concerning this information, please contact your gas scheduling representative or your Key Accounts Management (KAM) representative.
