

Pursuant to Section 20, GT&C, of EGT's Tariff, EGT is advising its shippers of a systemwide Operational Flow Order ("OFO"). **Beginning Friday, January 23rd, 2026, and continuing through Monday, January 26th, 2026**, shippers will be required to maintain physical receipts at or above scheduled volumes and at or above physical deliveries. EGT anticipates it will be unable to support short imbalance positions and will be unable to provide any tolerance for short positions and, accordingly, EGT may reduce scheduled delivery quantities intraday to balance actual receipts and deliveries as necessary to maintain system deliverability and operational integrity. Shippers who fail to comply with Standard Operational Flow Orders are subject to penalties equal to two hundred percent (200%) of the applicable Daily Index Price(s) per Dth multiplied by the quantity of Gas by which they deviate from the requirements of the Standard OFO. Penalties for failure to comply with this OFO will be assessed beginning with Gas Day 23.

Due to the severe cold weather conditions and forecasted demand, EGT highly recommends shippers utilize receipts and deliveries in zones in which they have firm contractual entitlements.

EGT will continue to monitor the pipeline's pressure and imbalances and will, if necessary, take further actions, including the issuance of one or more Emergency Response Operational Flow Orders.

EGT will schedule receipts and deliveries in accordance with EGT's Tariff. It is anticipated that **this OFO will remain in effect through Gas Day 26 and may be extended beyond that date**. EGT will update this OFO as more information becomes available.

If you have any questions concerning this OFO, please contact your Scheduling Representative.
