

SOUTHWEST GAS CORPORATION

Notice Type: Stage 1 Operational Flow Order (OFO)
Posting Date: 02/27/2026
Notice Effective Date: 02/27/2026
Notice Effective Time: 8:00AM, PCT
Duration of Notice: Until Further notice
Line Pack Condition: High Line Pack
Extent of the Notice: Southern Nevada - ST-1 Customers
Reason for the Notice: Kern River Notice

Notice Text:

Southwest Gas Corporation (Southwest Gas) is issuing a Stage 1 Operational Flow Order (OFO) for Southern Nevada due to excessive packing and high line pack condition on Kern River Pipeline. Southwest Gas requires that transportation customers in Southern Nevada closely monitor their nominations and scheduled quantities versus usage. Southwest Gas requires that the daily positive imbalance be less than or equal to 7% of scheduled quantities or 5,000 therms, whichever is greater, for customers who operate in accordance with Section 6.9 of Schedule No. ST-1/NT-1 of its Nevada Gas Tariff No. 7. Positive imbalance nominations during this high line pack condition will not be accepted.

The tolerance stated above may be adjusted if pipeline conditions change. Customers who create an imbalance in excess of the daily tolerance stated above will be assessed daily excess imbalance charges and may be subject to non-compliance charges.

If you have any questions concerning this information, please contact your gas scheduling representative or your Key Account Management (KAM) representative.
