
With the extreme warm temperatures forecasted, storage fields' limited injection capability, and the lack of response to the Warm Weather Advisory, Ameren Illinois is declaring a system-wide Operational Flow Order (OFO) effective gas days Wednesday, February 18th through Thursday, February 19th. This notification is provided in accordance with Rider T - Transportation Service. Reduced deliveries of supply are encouraged to minimize the impact to customers. We appreciate your assistance during the extreme warm weather.
