OPERATIONAL MATCHING ORDER (OMO) - Over-Deliveries Restriction

During this time period, Gas Transfer Service will be restricted such that gas quantities can only be transferred within the Pipeline Scheduling Point (PSP) for which it is delivered and confirmed and from the same upstream pipeline.

Transit Point:

GTS customers and/or suppliers may deliver all or a portion of the scheduled deliveries to each PSP via a combination COH City Gate and/or the Transit Point, still complying with the COH tariff and not to exceed the percentages set forth above.

Choice and SCO:

Retail Natural Gas Suppliers and SCO Suppliers must continue to deliver the Demand Curve requirement such that daily confirmed volumes via the Transit Point and/or city gate PSP meets the demand curve.

Reason(s) for Notice: COH's pipeline storage rights limit COH's ability to accommodate positive imbalances between transportation customer supply and demand. As well as, COH's need to adhere to capacity limitations in its upstream pipeline contracts.
